Five important tips from the World Health Organization (WHO) to be safe from corona virus infection

- 1. Wash your hands frequently with soap and water**

- 2. Maintain social distancing from a person (at least 1 metre distance) who is coughing or sneezing.**
- 3. Avoid touching eyes, nose and mouth**

- 4. Practice respiratory hygiene:** covering your mouth and nose with your bent elbow or tissue when you cough or sneeze.
- 5. If you have fever, cough and difficulty breathing, seek medical care early**

Note: The aforementioned preventive measures will also greatly help to reduce transmission of Flu and other respiratory infections.

Stay safe!
